COMPANY PROFILE

HEADQUARTERS & SHOWROOM

CASALGRANDE (REGGIO EMILIA)

A major organisational and commercial hub

The company headquarters in Casalgrande (Reggio Emilia), strategically located in one of the most important ceramic districts in the world, offers logistics and production infrastructures and houses a showroom measuring 700 square metres: a showcase where clients can literally touch all the collections and admire their diverse applications.

500 square metres of administrative offices and 4,500 square metres of covered warehouses for storage of the entire range of finished products comprise an organisational hub that guarantees clients quick deliveries as well as efficient services and consultations.

Mosaico+ is part of the Mapei group, sharing in the business expertise and technical and organisational support this world leader in chemical adhesives for construction has to offer.

COMPANY PROFILE

MOSAICO+

DIFFERENT FROM ALL OTHERS

To design and make mosaics in a way that is different from all others: a distinguishing feature that aspires to excellence

A philosophy that is applied in all organisational and production processes, representing the true added value of the company. Mosaico+ explores all the expressive potential of mosaics, specialising and investing in the quality of materials and technology and researching original applications of mosaics. A continual focus on product development has led to successful cooperation with internationally famous designers, who open out and move beyond the idea of mosaic as a combination of chips, transforming it into a concept of all-inclusive design, centred on decorative floor and wall coverings. The quality and professionalism of Mosaico+ place it at the top of a Made in Italy production system, combining innovative technologies, a culture for design, and a deeply-rooted mosaic tradition.

COMPANY PROFILE

PERSONALISATION

DESIGNING WITH MOSAIC TILES

Innovation in form and in the choice of materials, as well as a wide variety and extension of range, characterise the products we offer

Every collection guarantees the utmost versatility and, in many cases, is preconceived to be mixed and matched, becoming a multifaceted matrix that inspires the creation of personalised projects for residential and commercial interiors. The Mosaico+ range is diversified, affordable and easy to use, but some product lines are also sophisticated and exclusive. Myriad hues offer the possibility of experimenting with textures and patterns, creating images with photographic resolution, or composing surfaces featuring colours and a variety of textures that stimulate architects and designers to explore new concepts of decor.

COMPANY PROFILE

RESEARCH & DEVELOPMENT

AT THE CUSTOMER'S SERVICE

Quality and professionalism of a Made in Italy production system

The Design Division in Carpaccio (Udine), a strategic point for the culture and tradition of Italian mosaics, conducts the research and development of new products. This is where all the customised client compositions, special projects, and the assembly of mosaics are done by hand, thanks to the finely honed skills of master craftsmen. The Design Division also drives the tradition of artistic mosaics into the future, thanks to the direct collaboration with the Scuola dei Mosaicisti del Friuli, which is still today an inexhaustible source of development and inspiration to be interpreted with a contemporary flair.

The Mosaico+ experts are always ready to provide advice on original and custom designs, solving any problem: from analysis of modularity or the subject to be portrayed through to recommendations for laying and grouting.

COMPANY PROFILE

COLLECTIONS

MATERIALS AND COLOURS THAT EXPRESS A UNIQUE STYLE

Mosaico+ produces mosaic tiles from a variety of materials and in different formats in 4, 6, and 8 mm thicknesses

The concept of a collection intended as an exclusive container is surpassed to expand and stimulate techniques of composition: all the tiles of the different product lines can be selected from a vast range of tiles in different colours, finishes, and formats and recomposed on modular sheets to create personalised combinations or motifs. The dominant material is glass, in all its declinations: from transparent luminosity to the brilliant iridescence of agglomerates with the inclusion of goldstone and precious accents of gold and metal, while the Area 25 and Crono collections with sintered glass offers highly resistant material suitable for use in high traffic areas. Metal, wood and stone with a variety of finishes are just some of the many complementary materials in the Mosaico+ offering.
